THE MESSAGE CONCORDANCE

INTRODUCTION

The Message has become one of the most popular reading Bibles in the United States. Eugene Peterson's unique Bible translation has opened the Scriptures in a fresh new way to millions of readers, helping them connect the truths of the Bible to their daily lives.

Readers of The Message, however, needed a companion tool to help them use this translation in personal Bible study. Words or phrases that opened up a passage for them were hard to find in other parts of Scripture. And when studying a theme based on words found in a traditional translation, it was difficult to find parallel themes in The Message.

The Message Concordance gives readers of The Message three tools to mine the richness of Peterson's translation for their study of Scripture. Like The Message itself, this concordance is unique:

It's a word concordance that features the contemporary words unique to The Message. To ensure usability, not every word in The Message has been included. We've eliminated conjunctions (and, the), pronouns (he, she, they), minor biblical words, and other common biblical words that appear too often to be listed.

It's a synonym concordance that helps you bridge the gap between words you may be familiar with in a traditional translation (such as the NIV or KJV) and connect them with synonymous words used by Peterson in The Message.

It's a phrase concordance that lists entire phrases that are unique to the visual writing style Peterson employs in The Message. One of the features readers appreciate most about The Message is Eugene Peterson's ability to use not just individual words but entire phrases to communicate biblical concepts.

Now your favorite reading Bible can be a valuable tool in your personal study of the Scriptures as well!
